September 29, 1989 Issue 506

DXpedition News

United Arab Emirates - A6 Don Greenbaum WB2DND will be active from this very rare location Oct. 15-18, as **A61AD**. Don is setting up a complete station for this newly-licensed amateur, and will be teaching him about handling the expected pile-ups, in free-style operation, rather than lists. Look for Don on the usual DX frequencies, both SSB and CW, with special attention to 40 meters (7030 kHz) at local sunrise: 0230Z. Don is the author of the computer duping and QSLing program that Tom Gregory N4NW used in Africa, and he'll be using that program from UAE, so beware of 'insurance' contacts. Don expects to return to UAE for another operation next year, and will get on RTTY if someone can help with RTTY equipment that is compatible with the Compac 386 computer. QSL home call: 250 Standish St., Duxbury MA 02332. Sunset 1400Z.

Edited by Chod Harris VP2ML

The DX Bulletin

America's Premier Weekly Amateur Radio Publication

Armenia - UG The Prometheus Amateur Association (PAA) returns to Armenia Nov. 9-19. Expected callsigns are **RB5IJ/RG9, RB5IUL/RG3,** and **UB4IYU/RG4**. Thanks to the support of the European DX Foundation, the group will be on RTTY, as well as CW and SSB. All equipment, including the RTTY gear, will remain in Kirovakan for the use of the local radio club. The PAA is offering an award for working the DXpedition stations. QSL direct to P.O.Box 1, Enakiewo 29, Donetskoy Oblast, 343820 USSR.

Ukraine - UB The RL8PYL group that was active from Vietnam early this year is on now as **UL7PCZ/RB1M** on CW and SSB, and as **RL7PYL/RB1M** on RTTY, until the end of September. QSL P.O.Box 43, Temirtau, Kazakh Rep. 472310, USSR. This is Oblast 059, Voroshilovgrad.

Reserve Your Island

- Alain F6BFH and 10 other French and French Guiana amateurs will be on as **FY9IS** from Salut Island (SA-20) in CQWW SSB. The operators will sign **FY/** their home calls for two days before and one day after the test. QSL FY9IS via FY5AN.
- K3KG, K3ZR, and K4FJ will operate multi-single from Barbados (NA-21) as **8P9X** in CQWW SSB. QSL via K4FJ. Before and after the test, **8P9HQ** will be active on SSB and **8P9HR** will be on CW, all bands, including the WARC bands. QSL 8P9HQ via K3ZR and 8P9HR via K4BAI.
- The UB3IWA contest team will be on from Oblast 013 in Georgia for both CQWW SSB and CW. Callsign will be either **UJ5FV** or **UA3IWA/UF6V**. They're offering the 'Upper Esmera' award for working them on two bands. QSL PAA, address in left column.

Shortly Noted

- The same PAA group is sponsoring a WPX award for working their club station **UB4IYU** with three of their special prefixes Oct. 1-31. Look for UB4IYU/RB6J Oct. 1-15, /UT2J Oct. 16, /UT6J Oct. 17, UT7J Oct. 18, UT9J Oct. 19, /UTØJ Oct. 20, /RT6J Oct. 21, /RT7J Oct. 22, /RT9J Oct. 23, and /UB6J Oct. 24-31. QSL PAA.
- Rafik F6EUX, ex-J28EO and FT8XA, returns to Kerguelen (AF-48) in mid-November, for one year. He has asked for the call **FT5XA**. QSL FD1ITD. (Thanks LNDX.)
- Jean-Pierre **5T5SR** is now active, but speaks only French. QSL Box 51, Atar, Mauritania.
- **5X7AF**, who gave out K4AF (the Pentagon radio club) as QSL manager, is a pirate, as is the recent 9G operator. And the **HBØ/DK8ID** operation was bogus; DK8ID died in 1986.
- Islands On The Air: Rocas Atoll (SA-??) will be on for the first time Sept. 28-Oct. 1. Look for **PYØFC/a** by PY7XC, **PYØFV/a** by PY7CV, and **PYØFF/a** by PYØFF. QSL routes as announced. (Counts for Brazil or Fernando?) **UZ1ZZZ/a** will be on from Kil'din Island (EU-82) Oct. 10-20. QSL UW1ZM, Box 2001, Murmansk 183071 USSR. **UAØBCU/a** is on (AS-42). Try 14026 kHz at 1330Z.
- Regulars (callsign, frequency or band, UTC): **V85HG** 3795 1300Z; **7P8EG** 7070-80 0230Z; **BV2A** 7007 1300Z; **UG6GAW** 7007 1400Z; **3B8FE** 14035 long path 1200Z; **9Q5DX** 14030 0500Z; **9VØVS** 14005 1030Z; **BZ4RC** 14033 11-1300Z; **TT8CW** 14027 0200Z or 21013 15-2200Z; **UI8IF** 14020 1330Z; **ZD7VJ** 14025 2330Z or 21025 19-2300Z; **4S7VK** 14182 long path 1200Z; **7X4AV** 14200 0200Z; **CN2AQ** 14260 0200Z; **VK9LH** 14180 10-1200Z; **3B8FK** 21021 1200Z; **8R1J** 21012 2030Z; **BY9GA** 21026 0000Z; **JT1KAA** 15M CW 01-0300Z; **RVØYF** 21012 0130Z; **9L1CM** 21237 2300Z; **ZD8DQ** 15M SSB 2130Z; **7P8DP** 28475 1500Z; and **ZD8BOB** 28555 20-2200Z.
- SSB net check-ins: 7159 kHz: C31UA 7P8EG; 14222: A61AC KHØAC; 14227: OE5GML/YK ZL7TZ 3D2AG 9K2CS 9K2HB 7X4LX 3B9FR KHØAC P29CG BZ1DX; 14256: SU1EK TU2TP VP8BUB CEØDFL FT4ZE 5T5HH; 21335: 7P8CI 7P8DX 3B9FR 4S7NMR 5V7DP TL8JL TU2UI 4S7PB.

Propagation Watch

Solar activity continues to roller-coaster up and down. From the solar flux peak that exceeded 300, this important index dropped to 155, its lowest value this year. As the more active side of the sun swings into view in the next two weeks, look for activity to pick up again.

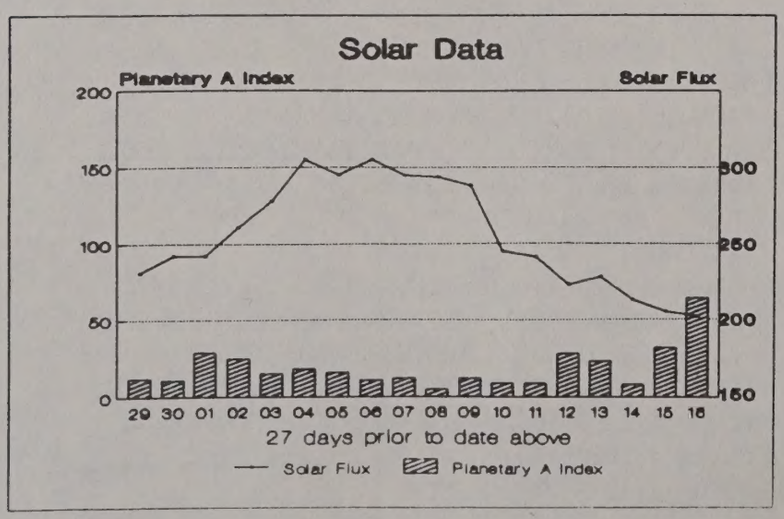
For the most part, the drop in flux didn't hurt propagation. The combination of a relatively quiet geomagnetic field and the seasonally good propagation at the equinox has produced excellent band conditions. One short-lived solar storm put a brief damper on the bands, but the A and K indices have been low most days.

10 meters has been especially good, opening very early in the morning, with good signal strengths. As the flux increases over the next two weeks, watch for the 10-meter long-path opening a few hours after local sunset.

The very reliable 20-meter long path around local dawn continues to yield choice DX, and it has been joined by reasonable long-path openings on 40 and 80 meters.

One caution: the enormous, magnetically complex Sunspot Region 5669 is due to return soon. This region produced dozens of Class M flares in early September, and although it showed signs of decay as it rotated around the west limb of the sun, it might disrupt the geomagnetic field with some flares in early October.

Finally, the propagation during the first two days in October is the best indication of how the bands will be during the CQWW SSB test 27 days later. Use the propagation these two days to map your band plan for the contest. Good hunting!



Hurricane Hugo

Hurricane Hugo, the most destructive storm this decade, devastated many Caribbean islands before slamming into South Carolina. Pedro KP4A reports losing his monster 3-element 80-meter beam. John Ackley KP2A lost five of his six towers, and suffered extensive water damage when the hurricane shattered most of the windows in his home. With much of the utilities damaged, other stations in Puerto Rico and the US Virgin Islands will be scarce on the bands.

The most heavily damaged island, however, was Montserrat. Hugo was the first hurricane to directly strike the island in 62 years, but it made up for the previous lack. Essentially all of the native housing was destroyed, the electrical generating plant shut down, and the airport buried under tons of rock and mud. Only a handful of structures escaped damage in the 150+ mph winds and high waves. Even with a massive relief effort from the British government, it will take the island years to rebuild what was lost in a single day. And yes, in answer to the dozens of inquiries, The Last Resort, my home and rental QTH on Montserrat, was a casualty of the storm. The house was completely destroyed.
